Job acceptance criteria
Open the documentation on API TRELLO

Examine the documentation, and see what actions can be performed through queries.
Create the following Postman requests:

Create a column on the board on the left in the documentation section called "Create a new List" add tests: to check the status of the code; review the request time; verify that the value of "name" is a string;

Create a column on the board on the right in the documentation section called "Create a new List" add tests: to check the status of the code; review the request time; verify that the value of "name" is a string;

Create one card in each of the columns that were created in tasks 1 and 2 on the board (2 cards in total) in the documentation section called "Create a new Card" create one card in each column that is on the board add tests: to check the status of the code; review the request time; verify that the value of "id" is a string;

Update the information about the created board in the documentation section called "Update a Board" change the name of the board add a description of the board add tests: to check the status of the code; check the request time;
